If the **AVERAGE WORKER**
makes \$84k/yr, that adds up
to **\$3699** in **productivity losses**,
PER EMPLOYEE, PER YEAR 

ANNUAL COST for entire staff

5 employees — \$18,495

10 employees — \$36,990

25 employees — \$92,475

50 employees — \$184,950

Accelerate Productivity, Reduce Risk, Maximize Profitability

The oil and gas industry is ever-changing: new technologies, increased demand for remote access and multiple devices, constant additions to security and safety regulations, and growing cyberthreats. That means costs are climbing and productivity is declining.

Partnering with **DKBinnovative** allows you to optimize your data and streamline your IT capabilities, which will not only reduce your risks in an already risky industry, it also will help you accelerate productivity. You can spend more time discovering and maximizing energy reserves and making investors happy.

PRODUCTIVITY

One hour of IT interruption means three hours of lost productivity for your company. That's why DKBinnovative measures success not only on the speed of IT resolution, but on how many issues we can prevent. Increasing your staff's productivity will allow you to receive crucial data quicker, improve communications, increase organizational flexibility, and maximize profitability.

VENDOR MANAGEMENT

Our experience managing vendors has helped us create a vast best-in-class network from which to select the best products and services for you. Let us negotiate the contracts and manage vendors so you don't have to. You'll get the best partners and the best terms.

CYBERSECURITY

Like all other industries, oil and gas is susceptible to the growing number, sophistication, and consequences of cyberattacks. Beyond compromising organizational and investor information, cyberattacks can cause complete system shutdowns. Our industry-leading cybersecurity expertise will keep your data safe, secure, and effective.

COMPLIANCE

Compliance is important, but it can be a productivity killer. Most organizations lack the necessary training, resources, and security measures to meet the growing list of industry compliance and reporting requirements. With DKB you can achieve compliance without compromising productivity.

Radically Different Approach, Dramatically Different Results

Your assigned virtual CIO visits your office once a month to get face time with your team and prevent potential issues before they happen. Additionally, we run quarterly security assessments to keep your data protected.

Everyone at our service desk is a high-level, experienced professional so that if you do encounter an issue, it is resolved within minutes rather than hours. And our unlimited tech support prevents loss of productivity, saves you money, and gives you peace of mind.
